Medical Math

Spring 2015  $149

The Medical Math course discusses mathematical instruction and review. You will be introduced to the three systems of measurement used to calculate dosages administered orally and intravenously. You will also learn to use critical thinking skills and arithmetic to understand medication orders and use equipment for preparation, administration, and labeling of medications. The course is online, self-directed, and self-paced.

At the end of this course, you will be able to:

• Analyze the use of medical mathematics in the healthcare system
• Convert efficiently between fractions, ratio and proportion, decimals and percentages
• Compute solutions to problems and determine the reasonableness of an answer by relating them to the problem and using estimation
• Interpret metric measurements and household measurements as they relate to allied health occupations.
• Convert between metric systems and household systems

This 41 hour time-on-task non-credit course is appropriate whether you are new to health care or are an incumbent health care provider.

Flexibility

Class times that fit your schedule
Fully online and completely self-paced
Lesson assessments to gauge comprehension and retention

Quality

Award-winning instructional design
Intuitive, understandable material

Career Mobility

Skills in demand in your area, now
Better job opportunities or workplace advancement
