Mobile Applications: iOS6

Spring 2015  $ 299

The Mobile Applications: iOS6 course provides an introduction to iOS6 technology. You will learn how to design and build dynamic, commercial-grade mobile applications for the iPhone, iPad, and iPod Touch. The course will provide a comprehensive understanding of the iOS6 mobile user interface and the experience and maintenance of applications. You will also learn how to create successful user interfaces for iOS6 applications. The course is self-paced, self-directed and online.

At the end of this course, you will be able to:

- Describe the process and necessary tools involved in becoming an iOS6 developer
- Identify the elements of Xcode's Interface Builder framework used to create a user interface
- Explain common features and tasks associated with advanced iOS6 application development

This 41 hour time-on-task non-credit course is appropriate whether you are a student or an IT professional and would like to build commercial-grade applications for the iPhone, iPad, and iPod Touch.

Flexibility

Class times that fit your schedule
Fully online and completely self-paced
Lesson assessments to gauge comprehension and retention

Quality

Award-winning instructional design
