RUNNING START MEMO OF UNDERSTANDING
Between
[COLLEGE & HIGH SCHOOL]

Period Covered: [ ]

[College], in cooperation with various New Hampshire secondary schools, provides the Running Start concurrent credit program for qualified students who may elect to earn Community College System of NH (CCSNH) college credits and required high school units simultaneously. It is intended that academically able students have the opportunity to realize college level expectations in the familiar and supportive setting of their high schools. This agreement sets forth all the rights and duties of the parties with respect to the Running Start program.

GENERAL PROVISIONS:

1. The curriculum in the course is the same as that offered on the [college] campus, including [college] department approved texts, course outlines, exams and the CCSNH grading system (i.e., A-F). The grades earned are considered dual credit – high school and [college]. [College] transcripts reflect course credit the same as that of other [college] courses. The college reserves the right to determine and periodically revise the conditions under which its programs may be offered for college credit and assumes responsibility for their supervision.

2. A course in the Running Start program should be taught over a comparable period in the high school as in the college (one semester usually), and in no circumstances will it exceed one high school academic year in length.

3. The potential high school Running Start teacher will forward a resume and transcripts to the Running Start Coordinator to be reviewed by the corresponding [college] department and the [college] Vice President of Academic Affairs (VPAA) to ensure that the high school teacher meets educational and experiential standards specified (see attached document, “Minimum Standards for Adjunct & Running Start Faculty”). Once accepted, a high school teacher will work in a “team arrangement” with a designated [college] faculty partner assigned by the college’s Department Head.

4. If a CCSNH college reviews the credentials of a high school faculty member who has applied to be a Running Start teacher, and concludes that the faculty member does not meet CCSNH credentialing standards, the Principal of the high school or the Director of the Career & Technical Education Center (CTE) may make a formal, written appeal to the CCSNH college’s VPAA for reconsideration. The VPAA will, in turn, bring the matter to the System VPAA Council which will review the credentials of the high school teacher and any other documentation provided by the high school/CTE center in its appeal. However, final decision-making authority will remain with the VPAA who brought the matter forward.

5. An orientation for high school instructors with the designated [college] faculty partner precedes the offering of the course and includes the examination of the course design,
teaching materials, methodology and other dimensions for facilitating the adaptation of
campus-designed courses to the high school setting.

6. Courses in the Running Start program will be open to Juniors and Seniors only.
   Exception: students participating in the Project Lead the Way program. Other exceptions
   may be granted by petitioning the [college] Department Head responsible for the course.

7. Students, parents, and personnel at the high school responsible for advising students
   should be aware that a course in the Running Start program is a college level course and
   students should be appropriately prepared for a level of academic rigor not usually
   associated with a high school level course.

8. Applicable academic policies and regulations as stipulated in the [college] catalogue shall
   apply to all courses, including basic skills, prerequisite course requirements, class
   attendance and accommodations for students with disabilities.

9. Students with documented disabilities may be eligible for accommodations and must be
   identified by the high school faculty partner and the high school liaison prior to
   registering for the class. The high school faculty partner and the high school liaison
   should be aware that modifications in an IEP provided in K-12 under the Individuals with
   Disabilities Education Act and Section 504 of the Rehabilitation Act are not permitted in
   college courses (see attached document, “Important Differences Between High School &
   College Support for Students With Disabilities”). Any questions about accommodations
   should be forwarded directly to the college’s faculty partner and Disabilities Coordinator.

10. There will be a minimum of four (4) Running Start students registered in a class for it to
    run as a course in the Running Start program. Exceptions can be made at the discretion of
    [college]. In addition, the high school is under no obligation to run a course in the
    Running Start program if it deems the enrollments are insufficient.

11. In a case where non-Running Start and Running Start students are mixed in a class, the
    course will, nevertheless, use the college’s approved syllabus and curriculum for the
    course.

12. Some Advanced Placement (AP) courses may also be compatible with the Running Start
    program. However, the course must be demonstrably the college’s course and use the
    college’s syllabus. The high school partner has discretion in determining how the AP
    course requirements may be met above and beyond those required by the college’s
    course.

13. Students must register for a course in the Running Start program by the designated
    deadline. Retroactive registration will not be permitted.

14. The cost of a course offered in the Running Start program will be established by the
    Board of Trustees annually (currently $150.00).

15. CCSNH will be the sole provider of a concurrent credit course in a given class.
**THE COLLEGE AGREES TO:**

1. Present to the high school, each year, a list of [college] approved courses as appropriate for Running Start consideration by the high school. The list will be updated as appropriate.

2. Provide descriptive information for each course included in the Running Start program. This description is to include an extensive course syllabus, text materials and course assessment instruments.

3. Provide an orientation to the high school’s Running Start liaison (see attached).

4. Assess high school teacher credentials for meeting [college]’s respective departmental credentialing standards, as well as faculty standards established by the college’s accrediting body, the Commission for Institutions of Higher Education (CIHE).

5. Provide a [college] faculty partner who will be responsible for: an orientation of the high school teacher to the college course and applicable college policies; a review of instructional materials, course outline and examinations; a classroom visitation; assisting, when requested, in the review of student performance; and coordination with [college]’s Running Start Coordinator.

6. Conduct a course review, including a classroom visitation by the [college] faculty partner, an evaluation of the course by the high school instructor, and an evaluation of the course by students participating in the course.

7. Invite the high school instructor to sit in and observe the [college]’s faculty partner’s class(es) at the college and provide documentation for professional development purposes.

8. Provide students with a [college] transcript on request.

9. Coordinate registration.

10. Provide funding and documentation for in-service or professional development training, if possible.

11. Provide course placement testing where appropriate.

12. Waive the application fee at any CCSNH college for students who participate in the Running Start program.

13. Provide a CCSNH course voucher for the high school Running Start liaison and for each course taught by a high school faculty partner.
THE HIGH SCHOOL AGREES TO:

1. Inform high school students and parents about the dual credit program and identify from the list provided by the college those courses available in the Running Start program.

2. Recruit high school faculty for the Running Start program.

3. Screen students for Junior/Senior eligibility in the Running Start program.

4. Identify an individual at the high school to be the Running Start liaison with [college]’s Running Start Coordinator (see attached liaison expectations).

5. Provide the opportunity for high school students to register for courses in the Running Start Program by the registration deadline.

6. Ensure that the high school RS faculty member completes the course approval process by August 1st for the Fall semester and December 1st for the Spring semester. Exceptions can be made for a late faculty replacement or new hire.

7. In the event that a previously credentialed instructor is no longer available to teach the course in the Running Start program at the start of a semester, the [college] Running Start coordinator will be informed immediately, and the high school will forward the resume and transcripts of the new instructor to the office of Academic Affairs at [college] for review. A course may not begin in the Running Start program unless the high school faculty member’s background has been reviewed by CCSNH to meet academic and experiential standards set by the college. However, at the discretion of the college, a high school instructor may be approved who does not meet credentialing standards. Such appointment will be for one time only.

8. In the event that a previously credentialed instructor begins a course in the Running Start program but must be replaced during the semester, or will be absent for an extended period of time, the [college] Running Start Coordinator will be informed immediately, and the new instructor’s resume and transcripts will be forwarded to the office of Academic Affairs at [college] for review. If the new instructor does not meet minimum standards for a [college] college faculty member, the college, at its discretion, may approve a high school instructor who does not meet credentialing standards. Such appointment will be one time only and may not exceed two individual or two consecutive semesters.

9. Provide academic counseling services for students enrolled in or seeking enrollment in dual credit courses. (See related item #7 under General Provisions).

10. Ensure that grades are submitted to the college in a timely manner so that students are ensured ready access to their grades.

11. Have textbooks and course materials paid for by the student unless provided by the school district.
12. Provide the opportunity, where feasible, for students to visit [college] at least once during the course to observe other [college] classes and take part in other [college] related matters jointly agreed upon by the college and high school faculty partners.

13. Support high school Running Start faculty in attending college sponsored Running Start professional development activities.

It Is Mutually Agreed That:

1. Representatives of both parties will meet as necessary for the purpose of planning for and evaluating academic and administrative aspects of this cooperative program and discussing any problems and matters regarding the relationship of the parties to this agreement.

2. This agreement shall become effective the date it is signed, and shall continue for a period of one year. The agreement may be terminated at any time by mutual consent of both parties. Either party may terminate the agreement by giving six months written notice.

(Courses offered in the Running Start program are identified on the attached addendum.)

For [college]:

For the Partnering High School:

Vice President of Academic Affairs

Principal, CTE Director or Designee

Community College System of New Hampshire
Minimum Standards for Adjunct & Running Start Faculty

Keeping in mind that decisions on faculty credentialing are made on a case-by-case basis, the following guidelines are used by college Vice Presidents of Academic Affairs in evaluating a person’s eligibility to teach a Running Start course or any other college-sponsored course. These guidelines are based on various accreditation standards each college must adhere to:

- In General Education areas* a minimum of a Master’s degree, preferably in the field being taught or a closely related field (e.g., a Master’s in Physics to teach Math). Individuals with a Master’s in Education will be considered, provided the individual has twelve (12) graduate credits in the content area being taught and a Bachelor’s degree in the content field or closely related field. Workshops, seminars, certifications, and other forms of professional development in the content area may also be considered in reaching the twelve credit requirement.

- (Tech I) In Technical and career areas, such as massage therapy, automotive, welding, electrical, HVAC, machine tool--those areas that were once considered “vocational,” a minimum of a Bachelor’s degree in the field or a closely related field. Individuals with an Associate’s degree and other forms of licensure or certification combined with a minimum of four (4) years related professional work or teaching experience would also be considered.

- (Tech II) In Technical areas such as engineering technology, computer technology, spatial information technology, biotechnology, a minimum of a Master’s degree, preferably in the field being taught or a closely related field. Individuals with a Master’s degree in Education will be considered, provided the individual has twelve (12) graduate credits in the content area or closely related field. Individuals with a Bachelor’s degree and other forms of licensure or certification combined with a minimum of four (4) years related work experience would also be considered.

- In Non-Technical areas such as Business, Accounting, Early Childhood Education, Human Services, Criminal Justice, Education, Travel and Tourism, a minimum of a Master’s degree, preferably in the field being taught or a closely related field. Individuals with a Master’s in Education will be considered, provided the individual has a Bachelor’s in the content area or closely related field.

- In Developmental areas, such as Math, English, Reading and Science, a Master’s degree in the area or closely related area. Individuals with a Bachelor’s degree in the area or closely related area will be considered provided they have a minimum of four (4) years teaching experience.

- Allied Health and other programs with national accreditations: variable depending on accreditation requirements (usually not appropriate for Running Start)

Exceptions to the above may be made by the Vice President of Academic Affairs if an individual can show equivalent academic and/or work or teaching experience. However, in no case will an individual be required to have qualifications exceeding those outlined above.

In addition, exceptions to the above may be made by individual colleges for a temporary appointment based on unusual circumstances as defined by the college. Such appointments may be done one time only and cannot exceed two individual or two consecutive semesters.

*General Education areas include the following: English, Communications, Humanities, Fine Arts, Foreign Language, Social Science, History, Religion, Philosophy, Math, and Science.

* Adapted from Jeanne Kincaid, Esq., Presentations at AHEAD Annual Conferences
Facilitate the course approval process by being available to provide any necessary paperwork to complete each course review.

Assist the Running Start Coordinator with scheduling classroom or large group presentations early in each semester.

Be available to answer any Running Start questions when the Running Start high school faculty partner is not available.

Assist in the Running Start registration process.

Assist the high school faculty partner in validating Junior and Senior status of students wishing to register for courses.

Assist the high school faculty partner in identifying students with disabilities and forwarding accommodation plans to the college’s Disabilities Coordinator.

Assist with the processing of any drop forms in a timely manner.

Provide periodic updates on courses to be offered each semester and the teachers that will be teaching those courses.

Assist with the submission of course and partnership evaluations to the college in a timely manner.

Assist with the submission of final grades to the college in a timely manner (timeline may vary for on-line grading).

Assist with the distribution of vouchers in a timely manner and follow-up with the Principals or CTE Directors who receive the vouchers.

Provide the Running Start Coordinator with any feedback regarding college acceptances of students’ CCSNH credits earned through Running Start.
