Accounting Degree: Program Outcomes

Upon successful completion of this program, graduates will be prepared to:

1. Understand fundamental accounting theory and practice, properly record ordinary business transactions for a corporation as well as a sole proprietor, and prepare financial statements for these businesses.

2. Identify, explain, and apply the impact on financial statements, using generally accepted accounting principles and managerial accounting concepts.

3. Prepare accounting functions and applications in both a “manual” and a computerized environment.

4. Interpret federal, taxable transactions and use tax software to prepare tax returns for both individuals and small businesses.

5. Conduct appropriate, ethical analyses of business problems and offer logical solutions.

6. Explain and apply basic business law theory and practice to common legal issues in a small business.

7. Conduct and present a professional work ethic and demeanor in an accounting workplace environment.
