Career and Technical Education Certificate: Program Outcomes

Upon successful completion of the program, graduates will be prepared to:

1. Recognize the history, legislation and philosophy of career and technical education.

2. Identify current and future trends relating to career and technical education.

3. Plan and develop technical programs that include program advisory committees, goals and objectives, occupational analysis, community surveys, student follow-up studies, and evaluation techniques utilizing state performance indicators.

4. Create career and technical curriculum that relate workplace cultural expectations to workplace skills and provide work-based learning opportunities.

5. Implement a career and technical student organization that enables students to acquire workplace, leadership, and communication skills as an integral part of the curriculum.
