

Environmental Science Degree: Program Outcomes

Upon successful completion of this program, graduates will be prepared to:

1. Demonstrate a basic understanding of biological and physical principles that govern natural processes.
2. Demonstrate a comprehensive understanding of the interdisciplinary relationship of ethical, cultural, social, scientific, and sustainability aspects of local and global environmental issues.
3. Identify and perform many different data collection methods along with a basic understanding of how that data will be processed.
4. Characterize and analyze human impacts on the environment and define changes that could be made to lessen this impact.
5. Integrate facts, concepts, and methods from multiple disciplines and apply them to mapping.
