Liberal Arts Degree: Program Outcomes

Upon successful completion of the program, graduates will be prepared to:

1. Apply mathematical models and concepts to problems and situations.
2. Think critically to solve problems, evaluate information, and interpret data.
3. Use scientific method in and out of the laboratory.
4. Use oral and written English to communicate clearly and effectively.
5. Explore diverse ideas to evaluate the effect of historical trends, events, institutions, and social systems on the development of humankind.
6. Students will demonstrate scientific thought both quantitatively and qualitatively by learning to recognize and formulate questions for analysis of human and technical problems.
7. Explore academic discipline options for transfer to 4 year colleges.
